Year-End Reporting: Help Is Here

Year-end planning and reporting are critical to keep businesses on track. Your business clients may not be aware of what's involved to prepare for year-end and finish the year fiscally strong.

Do you have clients who are?

- S-corps or LLCs that need to demonstrate wages for 2025 to receive W-2s
- Started a new business or added more employees
- Not prepared to implement the latest employment/payroll changes
- Operate in a state with a Federal Unemployment Tax Act (FUTA) credit reduction
- Looking to streamline invoice and payment workflows
- Ready for a fresh start to 2026 with a reliable partner like Paychex

With Paychex tools and resources, your business clients can feel prepared and informed on what's needed to successfully close out year-end tasks. With outsourced benefits administration, businesses can increase their access to expertise, which can give them more accurate information and advice than if they tried to learn these topics independently.

You're invited!

Navigating compliance can be tricky. We've got you covered with a **free webinar** that delivers an organized, easy-to-follow, year-end payroll checklist to help you avoid common mistakes and ensure nothing important is missed.
